LIGHT RESIGNS AS LORDSBURG FEARS PRESIDENT OF ATTACK BY SILVER CITY MEXICANS

Several Hundred Natives of Old Mexico Said to Be Armed While Americans Have Only Fifty Rifles.

Educator Who Has Built Up School During Eighteen Years of Service Says He Is not Candidate for Re-Election.

CAUSE OF DECISION
NOT MADE PUBLIC

[Special Dispatch to Evening Herald]

Silver City, N. M., April 25.—Dr. C. M. Light, for 18 years president of the New Mexico Normal school, has severed his connection with the same, to take effect Aug. 1st.

Interviewed by our correspondent, Dr. Light stated that he had had the matter under consideration for months and thought the time had come for him to step down and out.

As his resignation does not take effect until the end of August, it will in no way affect or interfere with the summer normal which has been Dr. Light's pride and joy and to which he has devoted many hours of labor and thought.

He is working harder than ever to make a success of it and expects an enrollment of between 250 and 400 students for the next session.

This will tax to the utmost the accommodations of the city, but there is no question that all the students will be properly and adequately cared for, not only by the city, but also by the various hospitals which will be at an expense of the high esteem with which Dr. Light is held here. He has done a wonderful work and has brought the normal school to a high standard. On every hand are heard expressions of regret at the resignation which has come as a great surprise to the citizens of this town.

Hon. Van T. Manville, president of the board of regents, when asked by your correspondent if there was any friction in the board or if there was dissatisfaction with Dr. Light's policies, replied: "This is the time of the year when the teachers are elected for the next term, and the American National bank lends color to the rumor that there is serious trouble in the affairs of the school."

Prof. T. G. Rogers, it is also stated, has resigned his position in the school. This in connection with the fact that Prof. E. L. Enloe was recently given a year's leave of absence to continue his studies in the Americas.

The American National bank lends color to the rumor that there is serious trouble in the affairs of the school.

The board of regents of the Normal school is composed of Van T. Manville, president; Jackson Agee, C. W. Marrott and Mrs. T. G. Rogers, all of Silver City; John C. Coffey, of Roswell; and Mr. Demmons. Mr. Marrott is a Republican and Mrs. Rogers' politics are unknown. She was appointed to succeed the late Judge Alford W. Conley, who was a Progressive and was in line with Governor McDonald's desire to place a woman on the various educational boards of the state. Prof. E. L. Enloe, representative of the state board of education by Governor McDonald, the senate refused to confirm the appointment; however, and Prof. Enloe was named in his stead.

NEW MEXICO GAINS 50,000 PEOPLE IN FOUR YEARS

Census Estimates Give State's Total Population Now as 383,551 Population of U. S. 109,000,000.

The United States is now a country of 109,000,000 people, according to the bulletin containing the estimates of population for the years subsequent to the thirteenth census, just published by Director William J. Harries of the bureau of the census, department of commerce.

Conforming to the previous circular No. 1, war department, D. A. M. Aug. 1, 1913, which provides for the following officers of the staff department—Judge advocate, surgeon general with rank of major, surgeon general with rank of major, chief of ordnance with rank of major—the following appointments have been made: Col. Frank W. Clancy, judge advocate general; Col. S. A. Milliken, surgeon general; Col. M. M. Padgett, chief ordnance.

The following appointments to the staff department are hereby announced to take effect this date:

Frank W. Clancy, judge advocate general, with rank of major; S. A. Milliken, surgeon general with rank of major.

The latest rank of colonel Frank W. Clancy and Major S. A. Milliken.

The estimated population of the United States for July 1, 1914, is 93,781,324, as compared with the previous year, 1913, of 91,972,366, as returned by enumeration on April 15, 1913. This bulletin also presents the estimates of population in 1910, 1911, 1912, 1913 and 1914, for the states and territories, and for cities which had 8,000 or more inhabitants in 1910.

As stated, the estimated population of the United States for July 1, 1914, is 93,781,324. The population in 1910 was 87,321,516, therefore will have been an estimated gain of over 7,000,000 persons in a little more than four years. The corresponding estimated population of continental United States for July 1, 1914, is 93,781,324, as compared with the previous year, 1913, of 91,972,366, as returned by enumeration on April 15, 1913. This bulletin also presents the estimates of population in 1910, 1911, 1912, 1913 and 1914, for the states and territories, and for cities which had 8,000 or more inhabitants in 1910.

The estimates of population are required primarily in the various bureaus in calculating death rates and per capita averages for years other than the census year. The so-called arithmetical method was adopted for computing these estimates. It is the simplest and it has been shown by experience to come nearer in accuracy in the majority of cases than any other method. It rests on the assumption that the increase in population each year since the enumeration is equal to the annual increase from 1900 to 1910.

The bulletin presents in its several tables population data for the United States and its outlying possessions in 1910 and 1900, with estimates for the population July 1, 1914, 1911, 1912, 1913 and 1914. Similar data is also presented for the different states in the Union. There is also presented a statement of the white and colored population on April 15, 1910, together with estimates of the white and colored population as of July 1, 1911, for each of the years 1911, 1912, 1913, 1914 and 1915.

These estimates, however, have been confined to the states having a considerable proportion of colored population, no estimate being presented for any state that did not have 50,000 or more colored inhabitants on April 15, 1910, or at least ten per cent of its population colored.

The estimates of population for July 1, 1914, and the population April 15, 1910, for all states are given and show New Mexico with 383,551, as against 327,361 in 1910.

Generally debilitated for years. Had sick headache, lacked ambition, was worn out and all run down. Burdock Blood bathers made me a well woman.—Mrs. Chas. Freitas, Muncie, Conn.

Unconsciously kicked out by some of his fellow comrades in arms.
